Stress Relief: Kneading, stretching and squishing slime can provide a feeling of calm and tranquillity.

Sensory Stimulation: Slime's unique texture provides a pleasant tactile experience, allowing different sensations to be explored.

Creativity Booster: This activity promotes improvisational skills, as well as imagination.

Fine Motor Skills Refinement: Molding and manipulating slime involves precise and controlled movements of the fingers and hands, strengthening hand muscles and improving hand-eye coordination.

You can find slime that is transparent, metallic, containing glitter, fluffy, fluorescent (glows in the dark), or perfumed with specific scents, alongside traditional Slime or the new Putty. All our products come in different and attractive customisable packaging.

We also have a wide variety of glues that come in a variety of formats. They are ideal for making Slime and creating crafts due to their low water content.

Our products are made with 100% natural and **non-toxic materials** and are **solvent-free**. They comply with all European regulations and the safety requirements of certified toys.
